This interactive computer program guides your biology and health professions students through the basic concepts of bright field light microscopy, developing and refining their knowledge by providing a more active role in learning. Simple, approachable, and largely qualitative, **Microscopy-Tutor™** uses three-dimensional animation to simulate a microscope with an integrated illuminator and adjustable field diaphragm. The CD-ROM's animated diagrams are more accurate than those found in most university-level texts, but are also easy-to-understand because key concepts and equations are presented visually rather than symbolically. Since using **Microscopy-Tutor™** feels more like operating a microscope than a computer, it's successful in presenting changes in dynamic processes that occur during alignment and use of the microscope -- greatly surpassing a static series of images found in a text. Rather than explaining what happens through the use of words and pictures, the user -- who learns by doing -- can see what happens and better understand the implications. In some sections, two animated perspectives are synchronized, allowing the viewer to change microscope settings and simultaneously see the resulting image. Interactive quizzes test the student's knowledge and accent areas for improvement. This innovative program makes complicated ideas easier to grasp -- and makes your job more rewarding!***Windows / Macintosh / Network Compatible***

From reader reviews:

Linda Pillar:

The reserve untitled Microscopy-Tutor™ is the book that recommended to you to see. You can see the quality of the e-book content that will be shown to an individual. The language that creator use to explained their ideas are easily to understand. The article author was did a lot of research when write the book, and so the information that they share to you personally is absolutely accurate. You also can get the e-book of Microscopy-Tutor™ from the publisher to make you a lot more enjoy free time.

Michael Hill:

Do you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't judge book by its protect may doesn't work this is difficult job because you are afraid that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer can be Microscopy-Tutor™ why because the excellent cover that make you consider concerning the content will not disappooint anyone. The inside or content is fantastic as the outside or perhaps cover. Your reading sixth sense will directly make suggestions to pick up this book.

Gordon Rollins:

This Microscopy-Tutor™ is great reserve for you because the content and that is full of information for you who also always deal with world and also have to make decision every minute. That book reveal it details accurately using great plan word or we can claim no rambling sentences within it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only offers you straight forward sentences but challenging core information with splendid delivering sentences. Having Microscopy-Tutor™ in your hand like obtaining the world in your arm, data in it is not ridiculous a single. We can say that no e-book that offer you world throughout ten or fifteen second right but this reserve already do that. So , this really is good reading book. Hi Mr. and Mrs. active do you still doubt which?

Craig Nazario:

As a college student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring as well as can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Microscopy-Tutor™ can make you really feel more interested to read.
