The River Dragon Has Come!: Three Gorges Dam and the Fate of China's Yangtze River and Its People

Dai Qing, John G. Thibodeau, Michael R Williams, Qing Dai, Ming Yi, Audrey Ronning Topping
In the ongoing courageous struggle of a relatively small group of Chinese to prevent the completion of the Three Gorges Dam in China, Dai Qing is the outspoken leader whose eloquent voice is always heard despite threats and intimidation by the Chinese authorities to silence it. Dai Qing, an investigative journalist and author with a wide audience in China and abroad, compiled this book of essays and field reports assessing the impact of the Three Gorges megadam now under construction at Sandouping in China's Hubei province at great risk to her own freedom. This book is an effort to prevent history from repeating itself ten-fold (a reference to the great floods in 1975 during which over 60 dams collapsed and at least 100,000 people lost their lives) if the 39 billion cubic metres of water in the Three Gorges reservoir ever escapes by natural or man-made catastrophes. These comprehensive essays reveal the deep rooted problems presented by the Three Gorges project that the government is attempting to disguise or suppress. The main concerns are population resettlement and human rights, the irreversible environmental and economic impact, the loss of cultural antiquities and historical sites, military considerations, and hidden dam disasters from the past. Opponents of the dam are attempting to kill the project or at least reduce the size of the megadam now planned to be the biggest, most expensive and, incidentally, the most hazardous of all hydro-electric projects on this planet.
