International Symposium: Retroviruses and Human Pathology (Experimental Biology and Medicine)

Robert C. Gallo, Dominique Stehelin, Oliviero E. Varnier

For decades retroviruses have been riding the crest of a wave of experimental research directed toward the identification of an infectious agent of human neoplastic diseases. In the early 1970s, several scientists successfully demonstrated the presence of retroviruses in numerous animal species and proved their etiological role in some related diseases. Corresponding findings in humans were somewhat discouraging. Although financial support for this line of research declined, a few dedicated retrovirologists survived and continued to collect more biological information and technological expertise that opened a new approach to the search for a human retrovirus. The rewards came with the discovery that the genes responsible for neoplastic transformation (oncogenes) are of cellular origin and can be shuttled about by retroviruses, and with the identification of a new family of Human T-cell Lymphotropic retroViruses (HTLV) from patients with diseases ranging from leukemia to the acquired immunodeficiency syndrome (AIDS). An understanding of the role and significance of retroviruses in human pathology requires basic knowledge of the major animal systems studied. With this perspective in mind, we present here a survey that includes general overviews, minireviews on each animal system studied with selected experimental reports and, finally, a stimulating review of the field of human retrovirology by many of the pioneer scientists who created it. We are especially grateful to Profs. C. A. Romanzi and G. C. Schito for promoting the organization of the Symposium. On behalf of the Symposium Committee, we thank E. Soeri, L. Casarino, G. P. Gesu, M.

From reader reviews:

Jose Carr:

Have you spare time for the day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a wander, shopping, or went to often the Mall. How about open or read a book called International Symposium: Retroviruses and Human Pathology (Experimental Biology and Medicine)? Maybe it is to get best activity for you. You already know beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have various other opinion?

Iona Calhoun:

Why? Because this International Symposium: Retroviruses and Human Pathology (Experimental Biology and Medicine) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will distress you with the secret it inside. Reading this book alongside it was fantastic author who write the book in such wonderful way makes the content inside of easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This amazing book will give you a lot of gains than the other book include such as help improving your proficiency and your critical thinking approach. So , still want to hold off having that book? If I have been you I will go to the guide store hurriedly.

Danny Floyd:

Your reading 6th sense will not betray an individual, why because this International Symposium: Retroviruses and Human Pathology (Experimental Biology and Medicine) book written by well-known writer who really knows well how to make book which might be understand by anyone who have read the book. Written in good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still doubt International Symposium: Retroviruses and Human Pathology (Experimental Biology and Medicine) as good book not only by the cover but also through the content. This is one e-book that can break don't determine book by its protect, so do you still needing another sixth sense to pick this kind of!? Oh come on your looking at sixth sense already told you so why you have to listening to another sixth sense.

Tonya Quick:

A lot of e-book has printed but it is different. You can get it by internet on social media. You can choose the most effective book for you, science, comedy, novel, or whatever by simply searching from it. It is referred to as of book International Symposium: Retroviruses and Human Pathology (Experimental Biology and Medicine). You can add your knowledge by it. Without making the printed book, it can add your knowledge and make you actually happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination to other place.
