The Age of the Atom (1900 1946) (Science Highlights: A Gareth Stevens Timeline) Charlie Samuels

This book gives a fascinating overview of the scientific breakthroughs that took place during the first half of the 20th century. During this time, science transformed the lives of everyone. New forms of transportation seemed to shrink the massive world. Mass communication brought people closer together. Scientists explored the potential of particles so small that no one had ever seen them before. Fun sidebars support the main narrative and timelines are also included.
