Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) Qiang Lu, Yuanzhang Sun, Shengwei Mei

Nonlinear Control Systems and Power System Dynamics presents a comprehensive description of nonlinear control of electric power systems using nonlinear control theory, which is developed by the differential geometric approach and nonlinear robust control method. This book explains in detail the concepts, theorems and algorithms in nonlinear control theory, illustrated by step-by-step examples. In addition, all the mathematical formulation involved in deriving the nonlinear control laws of power systems are sufficiently presented. Considerations and cautions involved in applying nonlinear control theory to practical engineering control designs are discussed and special attention is given to the implementation of nonlinear control laws using microprocessors.

Nonlinear Control Systems and Power System Dynamics serves as a text for advanced level courses and is an excellent reference for engineers and researchers who are interested in the application of modern nonlinear control theory to practical engineering control designs.

From reader reviews:

Benjamin Ward:

People live in this new morning of lifestyle always try to and must have the free time or they will get large amount of stress from both way of life and work. So , whenever we ask do people have time, we will say absolutely yes. People is human not a robot. Then we inquire again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, often the book you have read is actually Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science).

Leonard Dail:

Playing with family in a very park, coming to see the marine world or hanging out with pals is thing that usually you might have done when you have spare time, subsequently why you don't try issue that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science), you can enjoy both. It is great combination right, you still desire to miss it? What kind of hangout type is it? Oh can happen its mind hangout people. What? Still don't understand it, oh come on its known as reading friends.

Christopher Williams:

This Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) is great reserve for you because the content which can be full of information for you who have always deal with world and get to make decision every minute. This book reveal it details accurately using great organize word or we can point out no rambling sentences inside it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but tough core information with beautiful delivering sentences. Having Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) in your hand like keeping the world in your arm, info in it is not ridiculous just one. We can say that no guide that offer you world throughout ten or fifteen small right but this publication already do that. So , this can be good reading book. Heya Mr. and Mrs. active do you still doubt which?

Walter Burchett:

That e-book can make you to feel relax. This specific book Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) was colorful and of course has pictures around. As we know that book Nonlinear Control Systems and Power System Dynamics (The International Series on Asian Studies in Computer and Information Science) has many kinds

or category. Start from kids until youngsters. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore not at all of book are usually make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading which.
