Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research) N. S. Narasimha Sastry

This book presents a collection of invited articles by distinguished Mathematicians on the occasion of the Platinum Jubilee Celebrations of the Indian Statistical Institute, during the year 2007. These articles provide a current perspective of different areas of research, emphasizing the major challenging issues. Given the very significant record of the Institute in research in the areas of Statistics, Probability and Mathematics, distinguished authors have very admirably responded to the invitation. Some of the articles are written keeping students and potential new entrants to an area of mathematics in mind. This volume is thus very unique and gives a perspective of several important aspects of mathematics.

- Use of Resultants and Approximate Roots for Doing the Jacobian Problem (S S Abhyankar)
- Monodromy of Principal Bundles (I Biswas & A J Parameswaran)
- Oligomorphic Permutation Groups (P J Cameron)
- Descriptive Set Theory and the Geometry of Banach Spaces (G Godefroy)
- Multiplicity-Free Homogeneous Operators in the Cowen Douglas Class (A Korányi & G Misra)
- The Standard Conjectures on Algebraic Cycles (M S Narasimhan)
- On the Classification of Binary Shifts on the Hyperfinite II1 Factor (G L Price)
- Symmetric and Quasi-Symmetric Designs and Strongly Regular Graphs (S S Sane)
- Perturbation Determinant, Krein's Shift Function and Index Theorem (K B Sinha)
- Zero Cycles and Complete Intersection Points on Affine Varieties (V Srinivas)
- Root Numbers and Rational Points on Elliptic Curves (R Sujatha)
- von Neumann Algebras and Ergodic Theory (V S Sunder)
- Gutzmer's Formula and the Segal Bargmann Transform (S Thangavelu)
- Finite Translation Generalized Quadrangles (J A Thas)
- Super Geometry as the Basis for Super Symmetry (V S Varadarajan)

From reader reviews:

Robert Rios:

The book Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research) can give more knowledge and information about everything you want. Exactly why must we leave the great thing like a book Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research)? Several of you have a different opinion about book. But one aim that will book can give many facts for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or facts that you take for that, it is possible to give for each other; you may share all of these. Book Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research) has simple shape but the truth is know: it has great and large function for you. You can seem the enormous world by wide open and read a reserve. So it is very wonderful.

Gayle Meek:

Reading a publication can be one of a lot of task that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new details. When you read a reserve you will get new information simply because book is one of several ways to share the information as well as their idea. Second, reading a book will make you more imaginative. When you studying a book especially hype book the author will bring you to imagine the story how the characters do it anything. Third, it is possible to share your knowledge to some others. When you read this Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research), you could tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a guide.

Harold Esparza:

Playing with family within a park, coming to see the water world or hanging out with pals is thing that usually you could have done when you have spare time, and then why you don't try issue that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research), you can enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is it? Oh occur its mind hangout guys. What? Still don't buy it, oh come on its referred to as reading friends.

Arthur Fabry:

Do you like reading a guide? Confuse to looking for your best book? Or your book has been rare? Why so many query for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book but also novel and Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research) as well as others sources were given

information for you. After you know how the truly great a book, you feel need to read more and more. Science e-book was created for teacher as well as students especially. Those textbooks are helping them to increase their knowledge. In different case, beside science guide, any other book likes Perspectives in Mathematical Sciences II: Pure Mathematics (Statistical Science and Interdisciplinary Research) to make your spare time a lot more colorful. Many types of book like this one.
