NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you will also need a Course ID, which your instructor will provide.

Used books, rentals, and purchases made outside of Pearson

If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase.

This package includes the loose-leaf version and MyEducationLab[®] with Enhanced Pearson eText.

This widely used text discusses major development theories as they relate to physical, social and emotional, and cognitive domains, and contains extensive applications for teaching and working with young children. It provides students of child development with a sound knowledge base of current theory and research in the field of early childhood growth, development, and learning and its translation into practice in the daily lives of very young children. Time-honored theories of child development are discussed and applied to current knowledge about how children develop and learn, and contemporary theories, such as Cognitive (Core Systems and Neoconstructivism) and Contextual theories (Dynamic Systems and Relationship-Based Theories) are included. The authors apply theories and the supporting research based on these theories to Early Childhood Education practices in the classroom and with families. The new edition features a strong emphasis on the application of information, examples of early learning guidelines and outcome standards, new Meeting the Needs of All Children sections, complete updating throughout, and video exercises and a policy video/question for applying knowledge.

Personalize learning with MyEducationLab[®]

MyEducationLab is an online homework, tutorial, and assessment program designed to work with the text to engage students and improve results. Within its structured environment, students see key concepts demonstrated through real classroom video footage, practice what they learn, test their understanding, and receive feedback to guide their learning and ensure they master key learning outcomes.
