Molecular and Biochemical Toxicology

Molecular and Biochemical Toxicology

An essential resource for graduate students, academic and industrial toxicologists, and environmental health scientists and professionals

Over the course of thirty years and three editions, *Introduction to Biochemical Toxicology* has been an important source for coverage of the ongoing quest to define the biochemical, cellular, and molecular events induced by toxicants at the cellular and organismic levels. Now, as the principles and methods of molecular and cellular biology as well as genomic sciences play an ever increasing role in mechanistic toxicology, significant changes have been made to the book, resulting in this important new edition-now titled *Molecular and Biochemical Toxicology*, Fourth Edition.

Much more than an introductory text, this crucial new edition has been completely revised to provide timely and thorough coverage of the underlying biochemical, molecular, and cellular mechanisms through which toxicants produce their adverse effects. Toxicological issues are covered from the molecule to the cell to the organ level. Complex methods used in toxicology are also described in a straightforward, easy-to-understand style. Additional features of this new edition include:

- New chapters that explore the interface between toxicology and genomic sciences, including: bioinformatics, proteomics, metabolomics, and toxicogenomics
- Increased emphasis on structure, mechanism, and regulation of xenobiotic metabolizing enzymes, toxicogenetics, and xenobiotic transporters
- Additional new chapters on: molecular epidemiology and genetic susceptibility, DNA damage and mutagenesis, DNA repair, mechanisms of cell death, mitochondrial dysfunction, metals, reproductive toxicology, developmental toxicology, and reactive oxygen/metabolites and toxicity

Molecular and Biochemical Toxicology, Fourth Edition guides graduate students, toxicologists, and environmental health professionals through the principles of molecular and biochemical toxicology and the complex mechanisms of toxicity. Whether it's used in the classroom or in industry, research, or academia, this book is essential for anyone interested in understanding the molecular mechanisms through which toxicants produce adverse effects.

From reader reviews:

Virginia Cherry:

Within other case, little individuals like to read book Molecular and Biochemical Toxicology. You can choose the best book if you like reading a book. Provided that we know about how is important any book Molecular and Biochemical Toxicology. You can add understanding and of course you can around the world with a book. Absolutely right, since from book you can understand everything! From your country until foreign or abroad you can be known. About simple issue until wonderful thing you are able to know that. In this era, we can open a book or maybe searching by internet system. It is called e-book. You can use it when you feel weary to go to the library. Let's study.

Paul Evans:

Do you certainly one of people who can't read satisfying if the sentence chained in the straightway, hold on guys this particular aren't like that. This Molecular and Biochemical Toxicology book is readable by you who hate those straight word style. You will find the info here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to deliver to you. The writer involving Molecular and Biochemical Toxicology content conveys the thought easily to understand by many people. The printed and e-book are not different in the information but it just different in the form of it. So , do you continue to thinking Molecular and Biochemical Toxicology is not loveable to be your top collection reading book?

Avis Marguez:

Is it an individual who having spare time then spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This Molecular and Biochemical Toxicology can be the response, oh how comes? A book you know. You are so out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these books have than the others?

Scott Harrington:

As we know that book is vital thing to add our understanding for everything. By a publication we can know everything we would like. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This guide Molecular and Biochemical Toxicology was filled concerning science. Spend your extra time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you can feel enjoy to read a guide. In the modern era like right now, many ways to get book that you just wanted.
