Crocodiles: An Action Plan for Their Conservation

John B. Thorbjarnarson

Crocodiles: An Action Plan for Their Conservation John B. Thorbjarnarson

This Action Plan describes the conservation status of 23 species of the order Crocodylia found worldwide. The plan is arranged in three principal sections: an Introductory overview, Country accounts, and Species accounts. Each Country account describes the status of wild populations, and current management programmes. The Species accounts summarise the conservation status, principle threats, and existing management programmes and then describe the ecology and natural history of the species and set out recommended priority conservation projects.
