ZYTIGA Tablet: Indicated in Combination with Prednisone for the Treatment of Patients with Metastatic Castration-Resistant Prostate Cancer James Lee Anderson

“Although, your health condition may impact your everyday life, do not let it define who you are.” ZYTIGA (abiraterone) tablet is used in combination with another medication (prednisone) to treat prostate cancer that has spread to other parts of the body in men who have not been helped by other treatments including docetaxel (Docetaxel, Taxotere). Abiraterone is in a class of medications called androgen biosynthesis inhibitors. It works by decreasing the amount of certain hormones in the body. This medicine is available only with your doctor's prescription. Thanks and may you have a good understanding about this drug—ZYTIGA. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
