What if we've been looking at this 'alien' phenomena all wrong? What if there is more to the non-linear and non-local experiences that is backed up by science beyond our comprehension? This book explores the notion of alien agendas from a different point of view - one of open inquiry with a little science involved. UFO 'abductees' and 'contactees' will find this book refreshingly insightful and objective. Curious sorts will find the material intellectually stimulating and thought-provoking. The author takes an insightful experiential look at the UFO phenomena, possible alien agendas and the science behind the anal probes we've heard about for decades amongst the Ufology community. What he reveals may surprise you, yet it is definitely worth consideration. If you think 'they' are malevolent or have designs on controlling humanity in any way, perhaps it's time to reconsider your opinion based on some real-life events and interactions. The author has taken considerable risks to speak about his experiences, facing the notion of incredulity often expressed by those afraid of the truth or potentially something beyond their understanding. Isn't it time we explored a more investigative and rational approach to learning about our visitors, their agenda and history with planet Earth? Also available on Amazon and Kindle:
