The author presents a varied menu of ideas and experiences in many areas - in research, in diagnosis, and in psychotherapy, each using art media with patients of all ages. She integrates art, phenomenology and gestalt psychology, describing specific techniques and findings. Part I of the book lays out the theoretical foundations and the techniques; Part II addresses the formal components used in art therapy - line, shape and colour in their interrelated dynamics and discusses other aspects and modes of symbolic expression found in clients' work. Part III looks at symbolic expression through the scribble, offering a system of classification, diagnostic possibilities and case studies of work with eating disorders. Part IV focuses on art expression for art therapy diagnostics, including a method for qualitative diagnostics, and a first full diagnostic battery for adolescents.
