Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26)

This volume presents the papers based upon lectures given at the 1999 Seminaire de Mathematiques Superieurs held in Montreal. It includes contributions from many of the most active researchers in the field. This subject has been in a remarkably active state of development throughout the past three decades, resulting in new motivation for study in surprisingly different directions. Beyond the intrinsic interest in the study of integrable models of many-particle systems, spin chains, lattice and field theory models at both the classical and the quantum level, and completely solvable models in statistical mechanics, there have been new applications in relation to a number of other fields of current interest. These fields include theoretical physics and pure mathematics, for example the Seiberg-Witten approach to supersymmetric Yang-Mills theory, the spectral theory of random matrices, topological models of quantum gravity, conformal field theory, mirror symmetry, quantum cohomology, etc. This collection gives a nice cross-section of the current state of the work in the area of integrable systems which is presented by some of the leading active researchers in this field. The scope and quality of the articles in this volume make this a valuable resource for those interested in an up-to-date introduction and an overview of many of the main areas of study in the theory of integral systems.

From reader reviews:

Neil Williams:

Your reading sixth sense will not betray an individual, why because this Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) e-book written by well-known writer who really knows well how to make book which might be understand by anyone who all read the book. Written inside good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still uncertainty Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) as good book not merely by the cover but also by the content. This is one book that can break don't ascertain book by its cover, so do you still needing a different sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to an additional sixth sense.

Sylvia Harrington:

Many people spending their time by playing outside using friends, fun activity along with family or just watching TV all day long. You can have new activity to spend your whole day by looking at a book. Ugh, think reading a book will surely hard because you have to accept the book everywhere? It all right you can have the e-book, having everywhere you want in your Smartphone. Like Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) which is keeping the e-book version. So , try out this book? Let's notice.

Willie Quinones:

In this particular era which is the greater person or who has ability to do something more are more precious than other. Do you want to become among it? It is just simple solution to have that. What you are related is just spending your time very little but quite enough to enjoy a look at some books. Among the books in the top list in your reading list will be Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26). This book which can be qualified as The Hungry Mountains can get you closer in becoming precious person. By looking up and review this reserve you can get many advantages.

Lisa Loo:

You can obtain this Integrable Systems: From Classical to Quantum (Crm Proceedings & Lecture Notes, V. 26) by visit the bookstore or Mall. Just simply viewing or reviewing it may to be your solve problem if you get difficulties for the knowledge. Kinds of this reserve are various. Not only by written or printed but additionally can you enjoy this book simply by e-book. In the modern era like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose appropriate ways for you.
