Neuro-Ophthalmology Review Manual Lanning B. Kline MD, Frank J. Bajandas MD

A manual on clinical neuro-ophthalmology. This fifth edition contains two new chapters on disorders of visual integration and phakomatoses, and all chapters and references throughout the text have been updated. In addition, there is information on the interpretation of visual field findings, and the manifestations of cranial nerve syndromes are summarized. There are bibliographies in each chapter, along with a four-colour reproduction of a migraine. The reference should be useful both as preparation for certification examinations as well as for reinforcing the clinical neuro-ophthalmology principles used in everyday practice.
