The Gnostic Notebook: Volume Three: On Plato, the Fourth Dimension, and the Lost Philosophy (Volume 3) Timothy James Lambert

The last time we saw the author, he had just broken off his presentation of the seven key parables of Jesus, with only three remaining. These were the seven canonical parables identified within the Secret Book of James, the successful interpretation of which is supposedly sufficient to unlock the mysteries hidden within the teachings of Jesus. Lambert claimed that he was unable to continue without first revealing an "alternative philosophical/cosmological system based on the properties" possessed by structures built from tightly packed spheres of specific quantities. Now he is back with a new book which documents his quest for this mysterious system. Follow along as Lambert searches for evidence of this secret system in the most peculiar of places from Salvador Dali's Crucifixion (Corpus Hypercubus) through Plato's Allegory of the Cave to the very formation of the elements and beyond. What he finds almost defies explanation, and this book is certain to challenge the beliefs of any who read it.
